

## Product Change Notification

CPTC RESETTABLE FUSES

November, 2017

### Bourns® Model CMF-xxxx-AP Ceramic PTC Resettable Fuses *Change to Packaging Method*

Effective immediately, Bourns is changing the packaging method for all [Model CMF-xxxx-AP](#) Ceramic PTC products which utilize an ammo packaging method (i.e., all CMF parts with the suffix “AP”). Bubble wrap is being added in-between each ammo layer to protect the part marking during transportation. The bubble wrap will help protect the products in the different layers from friction which could affect the marking on the parts.

The only change is adding bubble wrap in between each ammo layer with no change to the products themselves. There is no change to the form, fit, function, quality or reliability of the products.
