## Bourns® Trimpot® Division Announces 3006P-7 Product Update

Bourns is pleased to announce a product update to the Model 3006P-7. Effective April 18, 2005 with date code 516M we will phase-in a new UV curable epoxy. The new epoxy is tan in color, resistant to moisture and withstands the increasingly severe temperature excursions required for RoHS compliant product.

The traditional blue epoxy used in current product also performs well at elevated board processing temperatures.

The introduction of the new UV curable “tan” epoxy also helps differentiate Bourns from our competition.

Test data is available upon request.
