## **Bourns® Networks Product Line Announces Revision to Marking of Model CAY10 Chip Resistor Array**

Bourns® Networks product line advises that [Model CAY10](#) chip arrays will not have marking on the unit in the future. Consistent with other miniature components such as Models CR0201 and CR0402, complete information about the units on the reel will be contained on the label adhered to the reel. Pin 1 marking is not required, since the circuit is symmetrical with equal values.

During the transition, some shipments may contain a mix of marked and unmarked CAY10 chip array reels, but no single reel will contain marked and unmarked units. This change in marking has no effect on form, fit or function.
