RESISTOR NETWORKS

Model 4600 Series

Riverside, California - March 21, 2011 - The order rate for the [Bourns® Model 4600 Series](#) continues to exceed our current production capacity.

Beginning July 1, 2011, the maximum quantity shipped to every customer in units per month will be fixed. We will try to ensure that this quantity is equivalent to our distributors' monthly shipments to their customers. An email confirming the monthly quantity will be sent separately to every customer.

Please review your backlog of Bourns Model 4600 Series part numbers and give your [Bourns customer service representative](#) the sequence in which you require existing purchases to be shipped.

Please continue to place new orders using the usual system. Orders will be acknowledged based on the then current backlog and capacity. Please review your backlog periodically and inform your local customer service representative if you wish to make changes to the schedule of shipments. Changes will not be allowed to the shipments of a purchase order if our confirmed ship date is less than 10 weeks from when the request is made.
