Bourns Releases New Surface Mount Power Inductor and Common Mode Chokes Product Selection Guide

Riverside, California - March 29, 2010 - Bourns® Inductive Components Product Line is pleased to announce that printed copies of the *SMD Power Inductors and Common Mode Chokes Product Selection Guide – 2010* are now available.

This handy brochure outlines Bourns SMD power inductors and common mode chokes' styles, sizes, inductances, currents and DC resistances providing users a quick selection reference either for DC/DC converter or EMI filter applications.

This Selection Guide also highlights Bourns' other inductive products such as chip beads, chip inductors and a full-line of through-hole inductors. Available sample kits are listed at the end of the Selection Guide.

Please contact your Bourns local sales representative or Inside Sales representatives for a copy.
