Bourns Releases New Shielded Power Inductors

SRP4021HMCT Series

Riverside, California – April 4, 2025 – Bourns Magnetics Product Line is introducing the new [SRP4021HMCT](#) Series Shielded Power Inductors. These shielded power inductors are manufactured using a hot press molding process with metal alloy or carbonyl powders. They feature high heating/saturation current and low magnetic field radiation. Additionally, this new series offers a compact footprint and low profile of 1.9 mm.

These new inductors are well-suited for DC-DC converters and power supplies in consumer, industrial and telecom applications.

Characteristics:

Series	Size (mm)	Inductance (μH)	Heating Current Irms (A)	Saturation Current Isat (A)	Operating Temperature (°C)
SRP4021HMCT	4.2 x 4.3 x 1.9	0.1 – 10	3.1 – 19	3.3 – 35	-40 to +125

Please visit the Bourns website at bourns.com for additional product details and contact [Bourns Customer Service/Inside Sales](#) if you have any questions.

Features

- Shielded construction – low radiation
- Low buzz noise
- Hot press molding process
- High current
- Low DCR
- RoHS compliant* and halogen free**

Applications

- DC-DC converters
- Power supplies in consumer, industrial and telecom electronics
