## Bourns® GDT/OSP Products Group Releases New 2469 Series 5-Pin Surge Protectors with TBU® Electronic Current Limiter

Riverside, California - June 24, 2011 - Bourns® GDT/OSP Products Group now offers the [2469](#) family of 5-pin plug-in surge protectors with overvoltage and overcurrent (sneak current) protection. The 2469 utilizes the Bourns® TBU® Electronic Current Limiter.

The 2469 is designed to fail “open” should a power cross or high-current event in excess of the specified rating occurs.

The 2469 series is now available through authorized Bourns OSP distributors.

Please contact [Bourns customer service](#) for additional information.

### Features
