## Bourns® Model 82 Series “Vintage” Guitar Potentiometer

Riverside, California - January 8, 2010 - Back by popular demand, Bourns® Resistive Products Division announces the re-release of our [Model 82 Vintage Guitar Potentiometer](#) in response to continued requests by master luthiers. The Model 82 has been sought by many master luthiers and has become a prized possession by those who have them installed in guitars.

This custom guitar potentiometer, best recognized for its “Bourns blue” color, was originally designed and produced for two leading guitar companies in the late 1970s. This product is a culmination of popular features most widely requested by master luthiers.

Samples and production quantities are now available. For your convenience, the data sheet is available on the proaudio website @ [www.bourns.com/proaudio](http://www.bourns.com/proaudio).
