### Model PDB241-GTR - New Options Available

Riverside, California - June 7, 2010 - In continuing support of the Professional Audio Market and by popular request, Bourns® Sensors and Controls Product Line is pleased to announce an update to our Model [PDB241-GTR](#) Series 24 mm Guitar Potentiometer.

Model PDB241-GTR is now available with a long bushing, split-knurled or plain shaft, and in 250K or 500K audio taper resistance values. This specialty product is specifically suited for use in electric guitars with thick bodies.

Samples and production quantities are now available. For your convenience, the data sheet is now available on the pro audio website at [www.bourns.com/proaudio](http://www.bourns.com/proaudio).
