PRECISION POTENTIOMETERS

Bourns® Model 3610 Precision Knobpot® Potentiometer

Riverside, California - September 24, 2010 - Bourns® Sensors and Controls Product Line is pleased to announce the release of our [Model 3610 10-Turn Wirewound Precision Knobpot® Potentiometer in a *bushing mount version*](#) that will compliment the panel mount version. This product variation is being released in response to customer demand for a replacement to our Model 3600 Precision Knobpot® Potentiometer that was discontinued in 2006.

This unique precision potentiometer can be used in applications such as industrial and automation controls, test and measurement equipment, medical controls, and avionics.

For your convenience, the updated data sheet is now available on our website at www.bourns.com. Production quantities are now available.

This product is currently *not available in RoHS* compliant versions.
