Model PDB183-GTR Guitar Potentiometer w/Push-Pull Switch -

New Long Bushing Option Released

Riverside, California - December 15, 2011 - Bourns® Sensors and Controls Product Line is pleased to announce the release of a new long bushing option for the Bourns® [Model PDB183-GTR Series](#) Guitar Potentiometer w/Push-Pull Switch in continuing support of the Professional Audio Market.

In response to market demand, Model PDB183-GTR is now available with a long bushing for mounting through solid body guitars. This specialty potentiometer is available in both standard knurled or plain shaft styles, and the best-selling 250 k and 500 k resistance values.

Samples and production quantities are now available. For your convenience, the updated data sheet is now available on our Pro Audio webpage at www.bourns.com/proaudio.

Please feel free to contact [Customer Service/Inside Sales](#) with any technical questions you may have regarding this new option.
