## TURNS-COUNTING DIALS

### Model H-516 Turns-Counting Dial Release

Riverside, California - June 29, 2011 - Bourns® Sensors and Controls is proud to announce the release of our [Model H-516 Turns-Counting Dial](#). This new dial is specifically suited for interface with plastic shaft models such as the 3590S-1.

This new dial features a brake and new slotted set screws that can be tightened with a standard flat-head mini-screw driver. Special hex keys are no longer necessary to tighten the set screws.

Bourns® Turns-Counting Dials are the perfect complementary addition to our complete line of precision multi-turn potentiometers.

This product is now available in production quantities. The data sheet is now available on the Bourns website at [www.bourns.com](http://www.bourns.com).

Please feel free to contact [Customer Service](#) with any questions you may have regarding this product bulletin.
