

Product Extension Release

SLIDE POTENTIOMETERS

Bourns Announces a Product Extension for the PTL Series *Model PTL01 Slide Potentiometer with LED*

Riverside, California - January 16, 2017 - In line with our commitment to provide products with innovative design, superior quality and exceptional value, Bourns Sensors and Controls announces the release of our [Model PTL01 Slide Potentiometer with LED](#) in continuing support of the professional audio and professional lighting markets.

The Bourns® Model PTL01 is a 100 mm version of our popular Model PTL60 60 mm slide potentiometer with LED.

The Model PTL01 has the following features:

- 100 mm mechanical travel
- Standard carbon element
- A variety of colored LEDs
- A variety of standard resistance values
- A variety of taper options
- Center detent option
- RoHS compliant*

This new product extension can be used in professional audio mixing consoles, broadcast mixing consoles, and professional lighting consoles and controllers. Other popular applications include non-critical life support medical equipment and other typical applications where a lit slide potentiometer lever is desired.

Samples and production quantities are now available. For your convenience, the data sheet and MDS are now available at www.bourns.com.

Should you have any questions or need additional information, please contact [Customer Service/Inside Sales](#).
