## SENSORS & CONTROLS PRODUCTS

## Bourns Announces the Release of the Riedon™ Model SSA-2 Series Shunt Sensor – Analog by Bourns

Riverside, California – December 2, 2024 – In line with our commitment to provide products with innovative designs, superior quality and exceptional value, Bourns® Sensors and Controls announces the release of the [Riedon™ Model SSA-2 Series Shunt Sensor - Analog by Bourns](#).

The Model SSA-2 Series includes innovatively designed analog Hall Effect current sensors offering  $\pm 0.1\%$  sensing accuracy and  $\pm 0.1\%$  linearity over their entire current range, with low susceptibility to temperature drift.

This new product series is well-suited for a wide variety of battery-related current sensing applications including large-scale energy storage banks, renewable energy generation infrastructure, industrial motor drives, building automation systems and fuel cells.

Basic features and applications include the following:

### Features

- 100 A to 1000 A Nominal current
- AC or DC circuits
- 1500 VDC Reinforced isolation
- Amplified differential output,  $\pm 2.5\text{ V}$  peak
- $\pm 0.2\%$  Tolerance
- RoHS compliant\*

### Applications

- Battery systems
- UPS systems
- Renewable energy
- Motor drives
- Frequency inverters
- Fuel cells

Samples and production quantities are now available. For your convenience, the data sheet and Material Declaration Sheets are now available at [www.bourns.com](http://www.bourns.com). For more information on Bourns® Sensors & Controls products, check out our additional available resources in the [Bourns® Sensors & Controls Technical Library](#).

Should you have any questions or need additional information, please contact [Bourns Customer Service/ Inside Sales](#).
