

Product Update Memo

TRIMMING POTENTIOMETERS

August, 2016

Bourns Trimpot Product Line

Update for the Transition of Murata® Trimmer Products to Bourns

As previously announced, Bourns entered into an agreement with Murata to acquire the assets of Murata's trimming potentiometer product line. As of June 2016, Murata no longer accepts orders for their trimmer products.

Bourns is pleased to offer the following trimming potentiometer series for immediate ordering. To ease the transition from Murata® products to Bourns-manufactured replacement products, Murata granted Bourns permission to use Murata part numbers on Bourns-produced replacement products. The replacement Bourns® products with the Murata numerical part numbers will be manufactured to Murata specifications. Bourns' standard warranty terms will apply to replacement Bourns® products based on Murata specifications.

| Models Available Now | URL |
|----------------------|---|
| PV12 Series | http://www.Bourns.com/docs/Product-Datasheets/PV12.pdf |
| PV32 Series | http://www.Bourns.com/docs/Product-Datasheets/PV32.pdf |
| PV36 Series | http://www.Bourns.com/docs/Product-Datasheets/PV36.pdf |
| PV37 Series | http://www.Bourns.com/docs/Product-Datasheets/PV37.pdf |
| PVG5 Series | http://www.Bourns.com/docs/Product-Datasheets/PVG5.pdf |

Additional trimmer series should be available in the coming months as production assets continue to transfer from Murata to Bourns. They will include the following trimmer series:

| Models Coming Soon |
|--------------------|
| PVF2 Series |
| PVM4 Series |
| PVG3A Series |
| PVG3G Series |
| PVG3K Series |

Murata® open frame trimmers are also being discontinued. The suggested alternative products from Bourns include the following:

| Obsolete Murata Part Number | Suggested Bourns Replacement Part Number |
|------------------------------------|---|
| Murata® Model PVA2A Series | Bourns® Model TC42 Series |
| Murata® Model PVZ2A Series | |
| Murata® Model PVZ3A Series | Bourns® Model TC33 Series |
| Murata® Model PVZ3G Series | |

Bourns, Inc. was founded in 1947 when Marlan Bourns invented miniature linear motion and position potentiometers. In 1952, Mr. Bourns invented the Trimpot® trimming potentiometer. Bourns® Trimpot® trimming potentiometers are still the industry standard today. Additional company and product information is available at www.bourns.com.

Bourns is proud to continue to offer Trimpot® products for all of your application needs.

Should you have any questions or need additional information, please feel free to contact your [Customer Service/Inside Sales representative](#).
