Bourns® Sensors and Controls Division New Product Brochures

Riverside, California - April 1, 2008 - In line with our commitment to provide our sales force with collateral and sales tools, Bourns® Sensors and Controls Division is pleased to announce the release of two new product brochures supporting our newly released Model EMS22 Magnetic Encoder and previously released Model 3547/48/49 Precision Potentiometers.

The [EMS22 product brochure](#) provides an overview of the technology used in construction of this new product along with features and benefits. Also included are a list of applications and customization capabilities.

The [3547/48/49 product brochure](#) provides an overview of product enhancements and a listing of standard options now available with these new precision potentiometers. Cross reference tables are also included for your convenience to assist you in crossing from the older 3540/3541/3543/3545 models to the new models.

Copies of both brochures are now available. Soft copies are also available for download in the Library section of the Bourns webpage under Sensors and Controls. Please feel free to contact any of our Field Application Engineers with any technical questions.
