TRIMMERS

The Potentiometer Handbook Makes a Digital Return

Riverside, California - March 12, 2008 - In 1975, Bourns, Inc. along with the McGraw-Hill Book Company published *The Potentiometer Handbook Users' Guide to Cost-Effective Applications*.

Periodically we get requests from customers for information on how to get copies of the book.

We have solved the last question; the “Pot Handbook” is now online with a few minor changes:

- 1) We have eliminated blank pages.
- 2) We have replaced the content of the sections on Industry Standards and Military Specifications with active links to the appropriate documents on the respective web sites.
- 3) And more importantly, in order to make the document user friendly, we have cross-linked the Table of Contents to the individual chapters and pages.

The information contained in the “Pot Handbook” can be very useful to new design, component or manufacturing engineers. It is an excellent reference document for anyone looking for information about trimmers, panel controls or precision potentiometers and the materials used in their manufacture.

The PDF can be found in the Library of the Bourns website at www.bourns.com.

THE
POTENTIOMETER
HANDBOOK

Welcome to the on-line version of the “The Potentiometer Handbook” originally published in hard cover by McGraw-Hill Book Company.

We have made only a few changes to the original in the area of Industry Standards and Military Specifications.

The technology represented in this handbook has had no significant change in years and remains as viable today as it was when this volume was published.

To use this version you can scroll down page by page or you can go to the Table of Contents to select a specific subject or chapter and click on the title or page number to go directly to the section you selected.

To return to the previous view simply right click your mouse and select “Previous View” from the pop up window.

In order for these functions to operate properly you must use Acrobat Reader 8 or higher. If you need to download Acrobat for free, use the Acrobat icon below.

For more information you can also go to the Bourns web site at www.bourns.com, select applications information under the “About Us” button then selecting the “Library button”.

You may also want to review application information from the “Trimmer Primer” by using link below:
