Bourns® Professional Lighting Brochure Released

In line with our commitment to provide our sales force with collateral and sales tools, Bourns Sensors and Controls is pleased to announce the release of our new [Professional Lighting Focus Short Form Brochure](#).

This brochure gives an overview of various applications where Rotary Position Sensors, Precision Potentiometers, Encoders and Panel Controls can be used. Applications include light mixing consoles and controllers, computer controlled moving lights and cameras, moving stage platforms and lifts, and motorized lighting rigs.

Copies of the brochure are now available. A soft copy is also available for download in the [Technical Library](#) section of the Bourns website under Sensors & Controls.

Should you have any questions regarding this new exciting brochure, please contact [Customer Service/Inside Sales](#).
