## CERAMIC PTC THERMISTORS

### Bourns® Circuit Protection Division Expands Range of Ceramic PTC Thermistors

Riverside, California - April 11, 2007 - Bourns® Circuit Protection Division has added a dual in-line package to its range of Ceramic Positive Temperature Coefficient (PTC) thermistors. The component combines two resistance matched Ceramic PTCs together in a single ceramic housing. The 50 ohm component is available as a standard; other resistance values are available upon request.

A data sheet for the model [CMF-RD50](#) has been added to the Bourns website at [www.bourns.com](http://www.bourns.com).

Samples are available upon request.

#### Features

- Two resistance-matched PTCs in a ceramic housing
- Aids compliance with:
  - ITU-T K.20/21/45
  - Telcordia GR-1089-CORE
  - UL 60950, 3rd Ed.
- Narrow resistance tolerance
- RoHS compliant\*

#### Applications

Used as a secondary overcurrent protection device in:

- Customer Premise Equipment (CPE)
- Central Office (CO)
- Access equipment
