TURNS-COUNTING DIALS

Model H-516 Turns-Counting Dial New Option

Riverside, California - October 21, 2011 - Bourns® Sensors and Controls Product Line is proud to announce the release of a new option for our [Model H-516 Turns-Counting Dial](#). Part number H-516-3A is now available for 1/8" diameter shaft sizes.

Model H-516 Turns-Counting Dial features a brake and new slotted set screws that can be tightened with a standard flat-head mini-screw driver. Special hex keys are no longer necessary to tighten the set screws.

Bourns® Turns-Counting Dials are the perfect complementary addition to our complete line of precision multiturn potentiometers.

This new option is now available in production quantities. The updated data sheet is now available on the Bourns website at www.bourns.com.

Please feel free to contact [Customer Service](#) with any questions you may have regarding this product notification.
