## Bourns Releases Model PRM16 - 16 mm Motorized Potentiometer

Riverside, California - September 19, 2007 - Bourns® Sensors and Controls Division is pleased to announce the release of our new [Model PRM16](#) motorized potentiometer for the first time. This new panel control provides a suitable option to our growing portfolio of Professional Audio Components.

Model PRM16 features a long life carbon element, dual section, smooth manual operating feel, various taper options, center tap option and remote control capability. Applications include but are not limited to guitar amplifiers, mixing consoles, karaoke volume control and servo tracks. This model is RoHS compliant.

Samples are now available. The data sheet is available on the Bourns website. Production orders are now being accepted.

Please feel free to contact Bourns with any technical questions you may have regarding this new product.
