## Model PTS Slide Potentiometer New Lever Option

Riverside, California - April 23, 2007 - Bourns® Sensors and Controls Division is pleased to announce the release of a new option for our Model PTS High Grade Slide Potentiometer.

In response to requests from the professional audio market, the new “T” lever style option has been added. This lever style is the preferred design in professional audio and broadcast mixing consoles.

Samples of standard resistance values with this new lever style are now available. For your convenience, the [data sheet](#) is available on the Bourns website.
