POWER RESISTORS

Bourns Releases New Power Resistor Series

Riverside, California - January 15, 2009 - Bourns® Fixed Resistors Product Line introduces [Models PWR2010, PWR3014, PWR4318 and PWR5322](#). These components are surface mount wirewound resistors with a power rating ranging from 0.5 to 3.0 W. They have a wide resistance range (0.1 to 15K Ohm) and excellent pulse power characteristics.

These resistors are used in power supply circuits on boards for a wide range of computing, white goods, telecom and automotive applications for functions as diverse as current sensing in low ohmic values and surge protection.

PWR2010/3014/4318/5322 Features:

- Power ratings from 0.5 - 3 watts
- Large terminals and optimized body shape for power dissipation
- Excellent surge capabilities
- Low TCR
- RoHS compliant*

PWR2010/3014/4318/5322 Applications:

- Telecommunications
- Audio equipment
- Medical equipment
- Base stations
- Industrial equipment
