### **Model PDB241-GTR Series Guitar Potentiometer for Left-Handed Guitars Released**

Riverside, California - December 14, 2011 - Bourns® Sensors and Controls Product Line is pleased to announce the release of our new [Model PDB241-GTR Series](#) 24 mm Guitar Potentiometer for left-handed guitars in continuing support of the Professional Audio Market.

The PDB241-GTR Guitar Potentiometer is now available with a “C2” reverse audio taper that is specifically suited for left-handed electric guitars and basses. The potentiometer is available with the standard knurled or plain shaft options, standard or long bushing versions, and popular 250 k or 500 k resistance values.

Samples and production quantities are now available. For your convenience, the updated data sheet is now available on our Pro Audio webpage at [www.bourns.com/proaudio](http://www.bourns.com/proaudio).

Please feel free to contact [Customer Service/Inside Sales](#) with any technical questions you may have regarding this new option.
