SLIDE POTENTIOMETERS

Model PTL Slide Potentiometer New LED Color Option

Riverside, California - October 21, 2011 - Bourns® Sensors and Controls Product Line is pleased to announce the release of a new option for our [Model PTL Slide Potentiometer with LED](#).

In response to field requests, a new white LED has been added as an option. This slide potentiometer is used primarily in professional audio and broadcast mixing consoles. However, other applications including medical and industrial equipment frequently contain slide potentiometers with LED indicators in their control panels.

Samples and production quantities are now available. For your convenience, the updated data sheet is now available on our Pro Audio webpage at www.bourns.com/proaudio/. There is no change to distributor book prices, minimums or multiples for this new option.

Please feel free to contact [Bourns Customer Service/Inside Sales](#) with any questions you may have regarding this new option.
