PCNs to be Issued for Selected JW Miller® SMD Models

Riverside, California - July 16, 2008 - As stated in Product Update Memo, “*Transition of JW Miller® SMD Models to Equivalent Bourns® SMD Models*” (May 2008), PCNs will be required for some JW Miller® SMD Inductor models in order to maintain these JW Miller® models. It is planned that each PCN will affect three to five models. The release of the PCNs will be staggered over a period of months in order to facilitate the changes required by the users and at the factories. These PCNs are simply to alert customers to a change in manufacturing location and/or minor product changes.

A list of affected models is shown below. The list is **not** in the order in which the PCNs for the models will be released. A complete list of affected part numbers will be included with each PCN.

PM0603	PM105SB	PM13656S	PM42S	PM54
PM0805	PM124SH	PM13666S	PM43	PM628S
PM1008	PM125SH	PM1608	PM5022	PM638S
