MS5A Series – Power Module

General Information

The MS5A brings low profile and cost effectiveness to a surface mount package. Matching the footprint and pin-out of Lucent's Austin Lite™ series, the MS5A is perfect for point-of-load applications that demand a high performance power source.

Designed for use with today's latest microprocessors, ASICs, and DSPs, the MS5A provides superior transient response using Bourns Switch Power's patented V²™ architecture. This high efficiency converter includes a control pin for output enable/disable, and can also accept an external voltage across its output; an advantage when powering multiple input processors.
