ISOMOV® HYBRID PROTECTORS

Bourns® IsoMOV® Component Earns IEC 61051-2 Certificate of Conformity

Riverside, California – May 28, 2025 – Bourns, Inc. is pleased to announce that our innovatively designed [IsoMOV® Hybrid Protectors](#) have earned the IEC 61051-2 Certificate of Conformity and are UL 1449 listed — giving our customers another reason to trust this valuable component for safety and performance. Bourns® IsoMOV® Protectors are the first hybrid surge protection devices on the market to meet rigorous tests and detailed documentation required by these global standards. Furthermore, this compliance allows designers to confidently add the longevity and high-reliability benefits IsoMOV® protectors offer for an increasing variety of significant market applications where IEC certification is a prerequisite.

Agency Recognition

	EN IEC 61051-1: 2018 IEC 61051-2-2: 1991 IEC 61051-2: 2021 IEC61051-1: 2018 EN IEC 61051-2: 2021	J50668307

“Earning the IEC Certificate of Conformity is a noteworthy achievement for Bourns. It enables more customers to benefit from the extended lifespan and enhanced reliability of our IsoMOV® Protectors across a wider range of designs. The comprehensive documentation required to validate this innovative solution — especially in the absence of an existing IEC standard for hybrid overvoltage protection components — highlights our product team’s commitment to delivering top-tier solutions that give our global customers a competitive edge,” said Craig Shipley, President of the Bourns Protection Division.
