Bourns® Model PT25012L Inductor

Additional Manufacturing Site

Riverside, California – November 5, 2025 – In order to support our fast growing demand and enhance continuity of supply, effective November 24, 2025, Bourns will establish a new additional manufacturing site in Tunisia for the Model PT25012L Inductor. The affected part number is listed below.

| Affected Part Number |
|----------------------|
| PT25012L |

The new additional manufacturing site in Tunisia uses the same design, material, and manufacturing process as the existing site. The inductors produced at the new additional manufacturing site will meet the same data sheet specifications as the inductors from the existing site. The standard packaging quantity, packing trays and boxes used at the existing site will remain the same.

The form, fit, function, quality, reliability, and production lead time of these inductors from the new additional manufacturing site will be the same as the existing site. Traceability will be maintained through lot code and date code. The country of origin will change from Honduras to Tunisia for products produced at the new additional manufacturing site.

Samples are available upon request. Bourns recommends that customers test the affected part numbers in their specific applications for verification of satisfactory performance.

Implementation dates are as follows:

Date that deliveries of products manufactured at both manufacturing sites will begin: **November 24, 2025**

First date code using the above changes: **2548**

Orders for the affected part numbers received after November 24, 2025 may be filled interchangeably from the existing manufacturing site or the new additional manufacturing site.

If you have any questions or need additional information, please feel free to [contact Customer Service/Inside Sales](#).

Users should verify that the described changes will not impact the performance of the product in their specific applications.
