Select Bourns® SRP4020TA, SRP5015TA, SRP7050TA, and SRP7028A Series Shielded Power Inductors

Welding Process Change

Riverside, California – January 21, 2026 – In the spirit of continuous improvement, effective November 15, 2026, Bourns will change the welding method for select SRP4020TA, SRP5015TA, SRP7050TA, and SRP7028A Series Shielded Power Inductors. To increase welding strength and achieve robust reliability, the spot welding machine in the welding process will be changed to a laser welding machine. A list of affected part numbers is included below.

Affected Part Numbers		
SRP4020TA-100M	SRP5015TA-1R0M	SRP7050TA-220M
SRP4020TA-150M	SRP5015TA-100M	SRP7050TA-470M
SRP4020TA-220M	SRP7028A-220M	

The fit, form, and function of the affected part numbers will remain the same. The quality and reliability of the affected inductors should be improved as a result of the changes. Traceability will be maintained through lot code and date code.

Samples built with the above changes are available on request. Bourns recommends that customers test the affected part number in their specific applications for verification of satisfactory performance.

Implementation dates are as follows:

Date that deliveries of products manufactured with current welding process will cease: **November 15, 2026**

Date that deliveries of products manufactured with new welding process will begin: **November 16, 2026**

First date code using the above changes: **2647**

If you have any questions or need additional information, please feel free to [contact Customer Service/Inside Sales](#).

Users should verify that the described changes will not impact the performance of the product in their specific applications.
