## Bourns® SRR4818A Series Shielded Power Inductors

### *Process Automation*

Riverside, California – January 21, 2026 – To accommodate increasing production demands and in the spirit of continuous improvement, effective May 15, 2026, Bourns will change the inspection process from a manual process to an AOI (Automated Optical Inspection) process for the [SRR4818A Series Shielded Power Inductors](#). Additionally, the gluing and assembly processes will be changed to a single automated process. A list of affected part numbers is included below.

The fit, form, and function of the affected part numbers will remain the same. The quality and reliability of the affected inductors should be improved as a result of the changes. The country of origin of the affected part numbers will remain the same. Traceability will be maintained through lot code and date code.

Samples are available upon request. Bourns recommends that customers test the affected part numbers in their specific applications for verification of satisfactory performance.

#### Implementation dates are as follows:

Date that deliveries of products manufactured with current processes will cease: **May 14, 2026**

Date that deliveries of products manufactured with new automated process will begin: **May 15, 2026**
