Bourns® SRN4012TA and SRN4018TA Series Semi-shielded Power Inductors

Winding and Welding Process Change

Riverside, California – January 22, 2026 – To accommodate increasing production demands and in the spirit of continuous improvement, effective August 31, 2026, Bourns will change the winding and welding machine for the [SRN4012TA](#) and [SRN4018TA](#) Series Semi-shielded Power Inductors. The new welding machine will change its method from welding both terminals at once to welding each terminal individually. A list of affected part numbers is included below.

The fit, form, function, quality, and reliability of the affected part numbers will remain the same. Traceability will be maintained through lot code and date code.

Samples built with the above changes are available on request. Bourns recommends that customers test the affected part numbers in their specific applications for verification of satisfactory performance.

Implementation dates are as follows:

Date that deliveries of products manufactured with current process will cease: **August 30, 2026**

Date that deliveries of products manufactured with new winding and welding process will begin: **August 31, 2026**

First date code using the above changes: **2636**

If you have any questions or need additional information, please feel free to [contact Customer Service/Inside Sales](#).

Users should verify that the described changes will not impact the performance of the product in their specific applications.
