

PRODUCT CHANGE NOTIFICATION

MAGNETICS

Bourns® 2100, 2100HT, 2200, 2200HT, 2300, 2300HT, 5700, and 7100 Series High Current Toroid Inductors

Specification of Primary Manufacturing Site and Packaging Quantity

Riverside, California – April 28, 2026— In 2025, Bourns issued separate Product Change Notifications (PCN)—with document numbers [IC25158](#), [IC25159](#), and [IC25188](#)—announcing an additional manufacturing site in Tunisia for the [2100](#), [2100HT](#), [2200](#), [2200HT](#), [2300](#), [2300HT](#), [5700](#), and [7100](#) Series High Current Toroid Inductors. Those PCNs are linked above for reference.

We are pleased to confirm that this production site expansion is now complete.

To ensure a robust and redundant supply chain, both production sites will remain fully operational. This update specifies the final primary production location and associated packaging quantities for each affected part number, some details of which have changed from the previous corresponding PCN. Please refer to the part number table in the pages that follow for final standard packaging quantities (SPQ), ordering multiples (Mult), minimum order quantities (MOQ), and primary production site details. These new details override what was previously published in the three preceding PCNs.

We believe these diversified manufacturing solutions provide our customers with greater security and stability in an increasingly complex global market.

If you have any questions or need additional information, please feel free to [contact Customer Service/Inside Sales](#).
