Model PM3602 - Change to Pitch on Tape and Quantity per Reel

The distance between the center of the parts on the tape (pitch) of [Model PM3602](#), an inductor/transformer, will change to 20 mm beginning with date code 0909. Currently, the pitch is 16 mm between components on the tape-and-reel packaging. As a result of the greater pitch dimension, the quantity per reel will be reduced to 400 pieces per 13-inch reel (from the current 700 pieces per 13-inch reel).

Revised Pitch Dimension
