Transfer of Production of 4600 Series to China

Bourns announces the transfer of production of the 4600 series resistor networks from Japan to China. Due to the drop in demand for this type of legacy product over the past couple of years, capacity needed to be reduced to a level which is not sustainable in its current location.

For many years, Bourns has produced several custom-specific part numbers also known as TNAs (page 2). Bourns is now offering a last time buy for these part numbers with the current factory in Japan. Any requests for new and existing part numbers will be treated as new inquiries.
