Bourns® Inductive Components Announces Extended Values of SDR0403 Series

Bourns announces the availability of more values in the [SDR0403](#) Series power choke. New values will extend the range to 1000 μH . Formerly, the range of the SDR0403 was 1.0 μH through 270 μH . The new values added to the range are: 330, 390, 470, 560, 680, 820, and 1000 μH .

All of the values of Model SDR0403 are available in lead-free versions. The addition of an “L” suffix at the end of the part number designates a termination that contains no lead. Pricing for the standard and lead-free versions of the SDR0403 in the new values is the same as pricing for the existing values.

An updated specification sheet is available on the Bourns’ website, www.bourns.com, under “Inductors.” Samples are available on request.
