Bourns Trimpot Product Line Announces ***Change to Carrier Tape Width & MOQ for Model 70ABJ-4-Male Modular Contact***

Bourns Trimpot Product Line is changing the carrier tape width for the [Model 70ABJ-4-Male](#) Modular Contact. The carrier width is changing from 12 mm to 16 mm and the carrier tape unit pitch is changing from 8 mm to 12 mm. This improved design helps eliminate the camber effect which can occur after being sealed with cover tape. See Figure 1 and 2 on the next page for the specifications.

In addition to the improved packaging design, the Minimum Order Quantity (MOQ) will also increase from 500 pieces to 1,000 pieces per reel and the reel size is changing from 7 inches to 13 inches.

The improvement to the packaging and the increase in the MOQ does not affect the unit's form, fit, or function.

Affected Part Number: 70ABJ-4-M0E

Part Number	CURRENT Carrier Width	UPDATED Carrier Width	CURRENT Unit Pitch	UPDATED Unit Pitch	CURRENT MOQ	UPDATED MOQ	CURRENT Reel Size	UPDATED Reel Size
70ABJ-4-M0E	12 mm	16 mm	8 mm	12 mm	500 pcs.	1,000 pcs.	7 inches	13 inches

Implementation dates are as follows:

Date that shipping of existing packaging will cease: September 1, 2015

We will begin phasing in the new packaging: September 1, 2015

First date code using the above changes: 536T
