Bourns® Model 7914 Tact Switch Series

Improved Durability Cycle Specification

Riverside, California - October 5, 2017 - As a result of additional cycle life testing on the Bourns® Model 7914 Tact Switch Series, we are pleased to announce that the actuations cycle specification is being increased. The Model 7914 cycle specification is now 500,000 actuations. This is a 5-times improvement from the previous specification of 100,000 actuations.

The changed specification is the result of additional testing only. There have been no changes to the form, fit or function of the Bourns® Model 7914 Tact Switch Series.

Series	Previous Cycle Specification	New Cycle Specification
7914	100K Actuations	500K Actuations
