

Product Obsolescence Memo

CO & OUTSIDE PLANT PRODUCTS

November, 2012

Models 2377-01 and 2377-01-X1 (356M) 3-Pole Sealed Gas Tube Station Protectors to be Discontinued

Bourns Outside Plant Product Line will be discontinuing Models [2377-01](#) and [2377-01-X1](#) (356M) 3-Pole Sealed Gas Tube Station Protectors. A lack of same volume and diminishing demand necessitates this action.

The referenced models are superseded by [Models 2377-35-G and 2377-35-G-IDC \(Insulation Displacement Connectors\) Balanced Gas Tube Station Protectors](#). The replacement models offer superior performance and service life. Replacement part numbers have the same form, fit and function and the industry code is 356G.

Please plan for the following deadlines:

Last Time Buy Date: November 30, 2012

Last Time Ship Date: December 31, 2012

Should you have any questions or need additional information, please feel free to contact [Customer Service/ Inside Sales](#).
