THE BOURNS ADVANTAGE

Bourns is a leading manufacturer and supplier of position and speed sensors, circuit protection solutions, magnetic components, microelectronic modules, panel controls and resistive products.

From its earliest days, Bourns established a benchmark for quality, value, and innovation.

In 1952, Bourns patented the world's first trimming potentiometer, trademarked Trimpot®. Since then, many additional innovations have followed.

Bourns' dedication to excellence ensures continuous improvement of its products and services to satisfy customer requirements on a global basis.
