## METAL FOIL AND STRIP CHIP RESISTORS

Bourns offers several metal foil and metal strip chip resistors and EB welded metal strip shunts. These high-power resistors have very low resistance values and TCR due to their metal resistive element and are suitable for all types of current sensing applications.

Metal foil resistors are constructed with a metal foil resistive element mounted on a ceramic substrate for excellent heat conductivity. Metal strip chip resistors have electroplated tin (Sn) outer terminations for soldering onto the board. The resistive element is protected by an epoxy overcoat layer.
