

# PRODUCT BRIEF

## Fuel Level Sensors

### Customer-specific Solutions

#### OVERVIEW

As one of the early pioneers in the development of the contacting fuel level sensor, Bourns propelled their evolution with its proprietary ink systems that provided longer life with a high resistance to new fuels. Bourns continues to be a leader in this market based on the Company's more than 20 years of experience designing customer-specific solutions for a wide range of transportation applications. Contact us with your specifications and let us design a custom fuel level sensor that will meet your particular requirements.

#### FEATURES

- Over 3 million cycles (wet)
- Proprietary ink systems designed for a wide range of fuels
- 100 % electrically tested over full sweep
- Temperature range -40 °C to +125 °C
- Available with wire harness

#### BENEFITS

- Reliable long life contacting technology
- Designed for certain harsh environments, including low sulfur fuels
- Built-in quality
- Wide operating temperature range
- Adaptable to customer design

*Let Bourns provide you with a customer-specific sensor solution for all your precision brake wear sensor applications.*
